

This factsheet presents all age data on injury deaths and injury hospitalisations by numbers, rates, the three leading causes, gender, ethnicity and place where the injury occurred. The data for injury deaths were sourced via the Injury Prevention Research Unit (IPRU) from the New Zealand Health Information Service (NZHIS) for the year 2003 (the most recent year for which injury death data was available). The data for injury hospitalisations were sourced via the IPRU from the NZHIS for the year 2005 (the most recent year for which injury hospitalisation data were available).

INJURY DEATHS:

- ⇒ During 2003, 31 people from Gisborne died as a result of an injury.
- ⇒ Motor Vehicle Traffic was the leading cause of injury death.

Fatalities due to injury for Gisborne, including number, rates & leading causes, 2003
